

FloorScan™ UV Sanitizing Vacuum

The FloorScan™ UV Sanitizing Vacuum uses the same safe and powerful UV sanitizing technology used for years in hospitals, food processing plants and water treatment plants. Combined with the HEPA 12 multistage filtration, it effectively eliminates allergens and irritants – even the microscopic eggs of bed bugs, dust mites and fleas. Bagless design is easy to empty, and prevents recirculating pollutants back into your home.

- Safe powerful UV light is laboratory proven to eliminate up to 99.9% of Influenza A, MRSA and H1N1 in 1-5 seconds.
- Reduces germs, bacteria, pests and allergens on hard floors and carpet
- Reduces odors and deodorizes mattresses, carpets and upholstery
- HEPA 12 multi-stage filtration system
- Chemical free
- Powerful 1400 watt motor
- Continuous suction cyclonic action
- HEPA 12 multi-stage filtration system
- PCO antimicrobial coating underneath
