

FLOORSCAN-UV™

Advanced and Affordable Wrestling Mat, Floor and Locker Room Sanitizing

Multifunctional Sanitizing Adjunct of Wrestling Mats, Locker Rooms & All Types of Floors

Numerous microbes are attributed to wrestling mats, locker room floors, even shower floors. This is well documented. Most important is that some of these microbes can even become severe and can quickly spread and infect others. Our company has developed a reasonable, rapid, portable and very affordable UV wrestling mat, floor and room sanitizer and it is available now.

UV-C light is clean, green and effective when it comes to reducing bacteria and viruses. Our FloorScan is a powerful *adjunct* to your standard floor and mat cleaning programs.

UVC lights are sold to hospitals and clinics around the world and now we are making them available for everyone that is concerned about reducing microbes. Regular sanitizing with UVC light of your athletic mats, floors and rooms are both a proactive and prudent approach to what is a very serious and persistent problem for all athletic facilities.

Our stainless steel **FloorScan-UV™** measures 30" x 9" x 5" and is only 9 lbs. It comes with two (2) high output germicidal bulbs that can be shatter-proofed. Additionally, each unit comes with a digital/audible "PACER" so the operator does not move too fast or slowly. The detachable carrying handle allows unit to be easily carried from one place to another. The UV blubs last some 10,000 hours! And our base unit costs **only \$975**. Please request our accessory list.
