

# FLOORSCAN-UV™

## Advanced and Affordable Wrestling Mat, Floor and Locker Room Disinfection!!!

### Multifunctional & Rapid Disinfection of Wrestling Mats, Locker Rooms & All Types of Floors

Numerous severe skin infections, including **MRSA** are attributed to wrestling mats, locker room floors, even shower floors. This is well documented. Most important is that some of these skin infections can even become life and limb threatening and can quickly spread and infect others. **MRSA-UV, LLC** has developed an effective, rapid, portable and very affordable UV wrestling mat, all-type floor and room sanitizer and it is available now.

UV-C light is clean, green and mean, especially when it comes to bacteria and viruses. It is also a powerful adjunct to standard cleaning. Our UVC lights are sold to hospitals and clinics around the world and now we are making them available for everyone that is concerned about reducing these debilitating skin infections many of which can easily be prevented. Regular sanitizing with UVC light of your athletic mats, floors and rooms are both a proactive and prudent approach to what is a very serious and persistent problem for all athletic facilities.

Our stainless steel **FloorScan-UV™** measures 30" x 9" x 5" and is only 9 lbs. It comes with two (2) high output germicidal bulbs that are shatter-proofed. Additionally, each unit comes with a digital/audible "PACER" so the operator does not move too fast or slowly. The detachable carrying handle allows unit to be easily carried from one place to another. The UV blubs last some 10,000 hours! And our unit costs **only \$975**. Please, don't take a chance, call us today.
