

PHASOR-UV™

Rapid Car Interior UV Disinfection Light

UBER

Our unique Phasor-UV rapidly destroys 99% of all pathogenic bacteria and viruses present in taxis, police cruisers and more.

PHASOR-UV™

"POINT & SHOOT" UV SPOT SANITIZER

Rapid UV-C Light Sanitizing of Police Cruisers, Taxis, Personal Cars and Transport Vehicles!

The need to disinfect both hard and soft interior surfaces within a police cars and taxis cannot be overstated. Transport vehicles drivers and passengers encounter a host of infectious and contagious bacteria, viruses and fungus from the numerous persons that are transported daily within their vehicles. **Some even take these microbes home!**

Bodily fluids such as blood, vomit and feces are just a small part of the of the dangerous contagions that are spread throughout the vehicle interiors. More dangerous are the infectious microbes such as multi-drug-resistant tuberculosis, measles, and influenza, MRSA and so much more. Our **Phasor-UV™** augments standard cleaning procedures by emitting UV-C light at 254nm and effectively

destroying 99.9% of all microbes on surfaces, seats, computers and numerous other objects.

The **Phasor-UV™** is so easy to operate. Simply **Point-and-Shoot** at those objects and surfaces you feel needs sanitizing and in seconds you are done and *clean* to go!!

Phasor-UV™ is cordless, rechargeable and safe. Hundreds of spot disinfections on a single charge! Rugged design. **Only \$395.**
