VORTEX-UV™

ADVANCED PORTABLE ENVIRONMENTAL SANITIZER

Our new advanced and very portable **Vortex-UV** is designed to rapidly sanitize spaces 20' x 20'. For larger spaces, multiple units can be employed, or a single unit can be moved to multiple areas.

Our **Vortex-UV** provides 360° coverage, is remote controlled and even has both a PIR and radar type of motion detector shut-off systems should anyone accidentally enter into space that is being treated.

The **Vortex-UV** is rugged and robust and has many of the features of a much more expensive unit. Most important is that the tripod can be raised from 5' - 7' in height.

The **Vortex-UV** is ideal from sanitizing classrooms, offices, conference rooms, stores, hotel rooms, dressing rooms, medical examination rooms, nursing homes, patient rooms, restrooms, waiting rooms, dental operatories, restaurants, bars, shops and stores, hair salons, walk-in clinics, daycare facilities and much more.
